

smartnumbers

Flexible working

A growing number of businesses are coming round to the benefits of flexible working. With a phone number hosted in the **BT smartnumbers** cloud, staff are able to answer calls no matter where they are. Organisations can install a separate number on employees' personal phones that makes it simple to manage business and personal communications while on the go.

Number retention

When moving to a new office, your organisation may find that it is unable to keep its phone numbers. A change of numbers will cost you time and money. But **BT smartnumbers** gives you a no-hassle way of allowing you to keep your geographic numbers wherever you are in the UK.

Resilient telephony

All sorts of things can disrupt your organisation's ability to answer phone calls, damaging revenue and reputation. But with **BT smartnumbers** you never miss a call, no matter what happens. Your incoming calls are monitored and automatically diverted in the event of a failure or outage and you have complete control of where they are delivered at any time.

Recording and review

More organisations are looking to record their calls for compliance, dispute resolution and best practice. **BT smartnumbers** enables you to record and store all conversations from across your business for as long as needed. Cloud storage eliminates the expense of server space, and allows you easy access and review.
