

BYOD voice made easy, only with BT smartnumbers mobile.

Every now and again, an idea so simple comes along you wonder why no-one has thought of it before. Why do you give an employee a mobile for work – when they have a mobile of their own?

BT smartnumbers mobile is a business number on an employee's personal phone, enabled by an app. Simple – you own the number, they own the phone.

Features

- Receive and make calls using your business mobile number on your personal phone.
- Calls, voicemail and text messages are kept separate from personal communications.
- Voicemail and SMS messages are placed into your business email.
- Easily divert calls to a delegate.
- Powerful callback features when out of range and for home working.
- Record calls on demand.
- Fully itemised billing.
- GSM voice quality.

- Embedded within MDM enterprise security service (if required).
- Works with iPhone and Android smartphone.

Business benefits

You reduce company mobile costs: No need to provide a company mobile – just a number.

You own the number - you own the conversation: When an employee leaves, the company keeps the number.

You own the call answering policies: Call delegation and MI to ensure that calls are answered according to company policies.

Staff benefits

Staff get one phone – the one they want: Employees use their own smartphone and subscription and change whenever they wish.

Staff private and business lives are kept separate: Keeps personal and business calls, messages, texts and costs completely separate.

Business support when out of the office: Easy routing to delegates and business voicemail with call recording for convenience.
